\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Estimates in the 2020 row are italicized to indicate caution should be used when comparing estimates between 2020 and prior years because of methodological changes for 2020. See the *2020 National Survey on Drug Use and Health: Methodological Summary and Definitions* for details.

NOTE: Some 2006 to 2010 estimates may differ from previously published estimates due to updates (see Chapter 3 of the *2020 National Survey on Drug Use and Health: Methodological Summary and Definitions*).

NOTE: Estimates for 1971 through 1977 have been adjusted to improve their comparability with estimates based on later versions of the NSDUH instrument.

NOTE: Estimates for 1979 through 1993 have been adjusted for comparability with estimates for 1994 through 1998.

NOTE: Estimates for 1999 through 2020 have not been adjusted for comparability. See Appendix C of the *Results from the 2004 National Survey on Drug Use and Health: National Findings* for information on the comparability of the 1999 and later estimates with pre-1999 estimates.

Definitions: Measures and terms are defined in Appendix A.
